

Dependent claims 11 and 12 are directed to the adjustment holes in the flange sections 2c and in particular, sets forth the specific shape that allows the stop function to be provided.

It is believed that these added dependent claims patentably distinguish over the cited art, inter alia, for the same reasons advanced for the allowability of claims 4-7 and 8-10 set forth in the aforementioned amendment.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned VERSION WITH MARKINGS TO SHOW CHANGES MADE.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'I. Keschner', with a long horizontal flourish extending to the right.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS

Please add new claims 11 and 12 as follows:

11. The board anchor of claim 7 wherein each of said shaped openings are formed by first and second spaced apart protrusions extending into a cavity.

12. The board anchor of claim 11 wherein sufficient space is provided between said first and second protrusions to enable said attachment ring protrusions to extend therebetween, said extending protrusions limiting the angular rotation of said attachment ring protrusions.
